A Propane Service Plan is a Good Idea

(Including Hot Water Heater Coverage is Recommended)

Many of our propane customers do not realize that a propane heating system should be serviced each year. With normal use, including idle time, propane heating units can build up condensation and particulates that should be cleaned out as part of a tune-up.

We service the spectrum of propane heating units, and our annual tune-up will assure that your system is operating at peak efficiency. This also means that filters, critical to clean indoor air quality, are replaced and maintained each year. A properly maintained propane system can also increase the lifespan of the equipment and can keep energy usage as low as possible.

At Drum Oil & Propane, you are guaranteed priority service from a local provider that is there for you.
